80. FRONTEND ACCEPTANCE CRITERIA	9
81. IMPORTANT DEVELOPER RULE	10
82. FINAL FRONTEND MODULE LIST	11
83. FINAL PRODUCT PRINCIPLE	12

65. VERIFIED PROPERTY FRONTEND

Verified properties show:

- VERIFIED

Fully verified:

- FULLY VERIFIED

Click badge:

- View verification information

66. ERROR STATES

The frontend must have professional error messages.

Examples:

No properties:

No properties found matching your search.

Offline:

You are currently offline. Your changes have been saved and will synchronize when internet connection returns.

Permission:

You do not have permission to access this information.

Payment:

We could not confirm your payment yet. Please try again later.

67. LOADING STATES

Use skeleton loaders rather than blank screens.

Examples:

- Property card skeleton
- Dashboard skeleton
- Photo loading
- Map loading

68. RESPONSIVE DESIGN

Website must work on:

- Desktop
- Laptop
- Tablet

- Mobile

Admin dashboard should be optimized primarily for desktop/tablet.

Client website should be mobile-first.

69. ACCESSIBILITY

Frontend should support:

- Readable font sizes
- Good contrast
- Keyboard navigation
- Screen-reader-friendly labels
- Clear buttons
- Accessible forms
- Error descriptions

70. SECURITY FRONTEND RULES

Never store sensitive information unnecessarily in browser local storage.

Do not expose:

- Owner private phone
- Staff private data
- Financial information
- Internal notes
- Documents
- Admin permissions

to unauthorized users.

Frontend authorization must always be backed by backend authorization.

71. PUBLIC FOOTER

Footer should contain:

Company

- About Us
- Contact
- Careers
- Partners

Services

- Buy
- Rent
- Sell
- Verification
- Promotion

Legal

- Privacy Policy
- Terms & Conditions
- Verification Disclaimer
- Cookie Policy

Languages

- Français
- English
- Swahili

Social

- Facebook
- Instagram
- TikTok
- WhatsApp

72. ABOUT US PAGE

The About Us page should explain:

IMMO BURUNDI is a modern real estate marketplace and brokerage platform designed to improve transparency, accessibility and trust in Burundi's real estate sector.

It connects:

- Owners
- Buyers
- Tenants
- Investors
- Agents

The platform provides:

- Property listings
- Property verification
- Property promotion
- Rental support
- Brokerage assistance
- Digital property management

73. CONTACT PAGE

Display:

- Phone
- WhatsApp
- Email
- Office address
- Business hours
- Contact form

- Map
- Social media

Contact form:

- Name
- Phone
- Email
- Subject
- Message

74. LEGAL PAGES

Frontend must include:

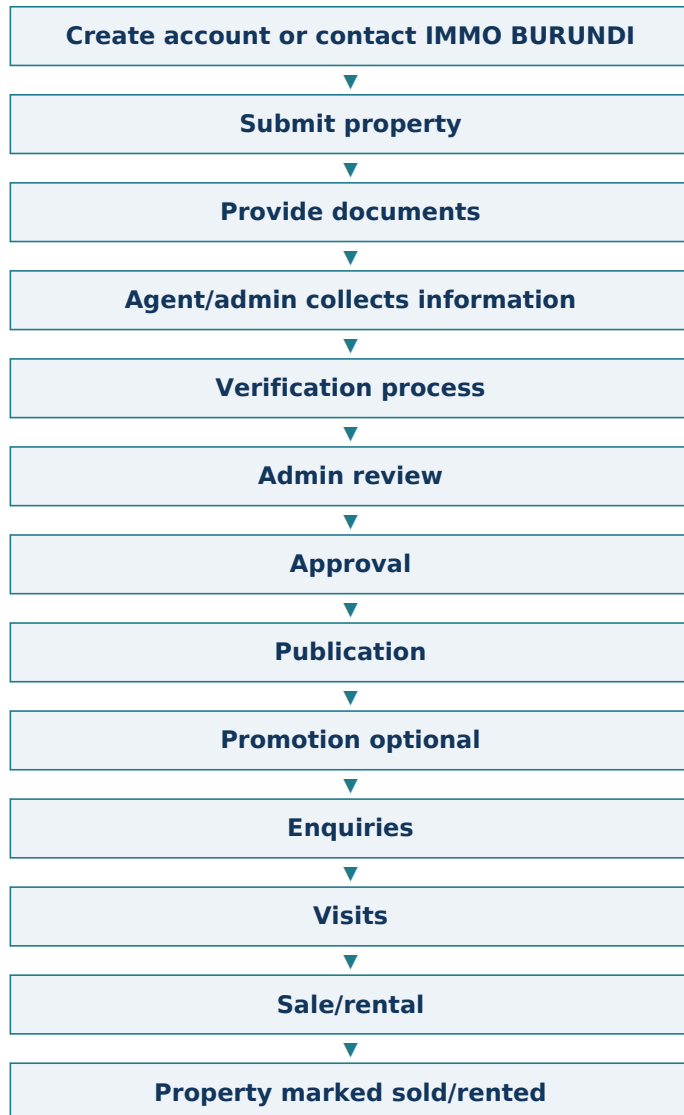

- Privacy Policy
- Terms & Conditions
- Verification Disclaimer
- Cookie Policy
- Service Agreement where applicable

Users should be required to accept relevant terms during:

- Registration
- Property submission
- Verification request
- Paid promotion
- Rental application where legally necessary

75. PROPERTY OWNER / SELLER FLOW

Owner who wants to list property:

76. ADMIN SETTINGS

Main Admin settings:

General

- Company information
- Logo
- Contact details
- Business hours

Languages

- English
- French
- Swahili

Currency

- BIF
- USD
- Exchange rates

Property

- Property types
- Listing types
- Verification rules

Rental

- Minimum advance
- Maximum occupants

Promotion

- Packages
- Prices
- Duration

Notifications

- Email
- SMS
- Push notifications

Permissions

- Roles
- Permissions
- Scopes

77. FRONTEND DESIGN STYLE

IMMO BURUNDI should have a professional real-estate identity.

Suggested design direction:

- Clean
- Modern
- Trustworthy
- Premium but accessible
- Mobile-first

The interface should avoid looking like a generic classifieds website.

78. BRANDING

The developer/designer should prepare:

- Logo
- App icon
- Favicon

- Color palette
- Typography
- Buttons
- Icons
- Badges
- Verification indicators

Verification colors:

- **Verified**
- **Partial**
- **Not Verified**

These colors must also have text labels so the meaning does not depend on color alone.

79. FRONTEND USER JOURNEY

New Client

Home → Search → Property → View → Contact/WhatsApp → Visit → Booking → Confirmation

Rental Client

Home → Rent → Property → Apply → Application → Status

Agent

Login → Agent Dashboard → Add Property → Offline/Online Collection → Submit → Review → Correction/Approval → Published

Verification Client

Property → Request Verification → Receive Code → Payment → Payment Confirmation → Verification → Result

Promotion Client

Property → Promote → Select Package → Payment → Confirmation → Featured Listing

Main Admin

Login → Dashboard → Monitor Operations → Accounting → Reports → Staff → Permissions → Audit

80. FRONTEND ACCEPTANCE CRITERIA

The frontend will be considered complete only when:

- All three languages work
- BIF/USD display works
- Property search works
- Property ID search works
- Property detail pages work
- Verification badges work
- Verification disclaimer is visible
- Agent submission works
- Agents cannot publish
- Admin review works

- Rental applications work
- Visit booking works
- Capacity limits work
- Countdown works
- Favorites work
- Sharing works
- WhatsApp contact works
- Property view analytics work
- Viewer privacy is respected
- Promotion interface works
- Accounting interfaces respect permissions
- Main Admin dashboard works
- Reports interface works
- Notifications work
- Mobile responsive design works
- Offline agent mode works
- Permission-based screens work
- Audit information is displayed to authorized users
- Legal pages are accessible
- Error and loading states are implemented

81. IMPORTANT DEVELOPER RULE

Do not build the frontend by simply hiding buttons.

For example:

If an accountant cannot access the Main Admin financial dashboard, hiding the dashboard button is NOT sufficient.

The backend must reject unauthorized API requests.

The frontend should then display:

You do not have permission to access this section.

The same principle applies to:

- Staff information
- Owner contacts
- Accounting
- Documents
- Permissions
- Reports
- Audit logs
- Internal notes

82. FINAL FRONTEND MODULE LIST

The developer should plan the frontend around these modules:

Public

- Home
- Search
- Property listings
- Property details
- Map
- Agents
- Featured
- Verified properties
- About
- Contact
- Legal pages

Client

- Registration
- Login
- Profile
- Favorites
- Applications
- Visit bookings
- Messages
- Notifications
- Property history

Agent

- Dashboard
- Property collection
- Offline mode
- Documents
- Photos
- Submission
- Property status
- Analytics
- Enquiries
- Performance

Admin

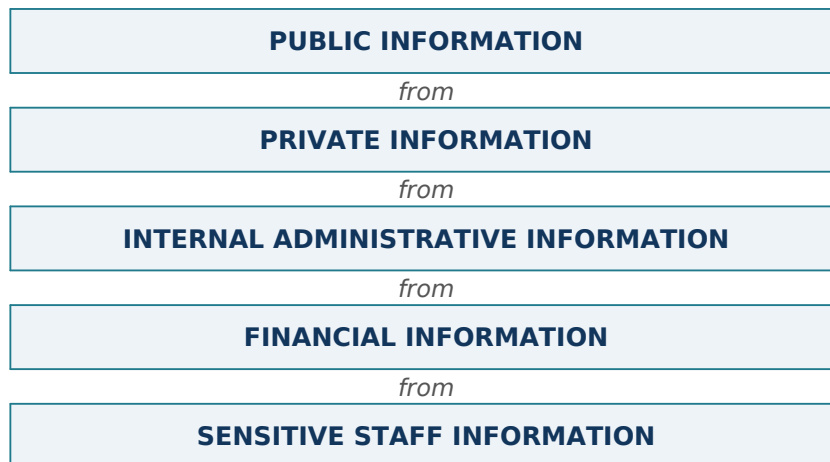

- Dashboard
- Properties
- Verification
- Agents
- Clients
- Staff

- Permissions
- Promotions
- Rental applications
- Visit sessions
- Accounting
- Reports
- Notifications
- Audit logs
- Settings

83. FINAL PRODUCT PRINCIPLE

IMMO BURUNDI should be designed as a professional real-estate infrastructure platform, not merely a website for displaying houses.

The frontend must therefore clearly separate:

Every screen must respect the user's role and permissions.

The frontend should communicate trust through:

- Verification information
- Transparent disclaimers
- Property history
- Professional agent profiles
- Secure communication
- Clear transaction references
- Visit booking
- Property analytics
- Reliable reporting

END OF FRONTEND SPECIFICATION
